PROJECT DIRECTOR'S MESSAGE

Delivering Excellence Through Safe and Responsible Pest Management

As Project Director, Vincent Tan leads project operations with a strong focus on safety, quality, innovation, and customer value. His approach combines careful planning and effective coordination with a commitment to continuous improvement. He ensures that projects are delivered safely, efficiently, and to a consistently high standard.

Environment: Prevention Before Treatment

We apply Integrated Pest Management (IPM) through prevention, monitoring, precision, and responsible treatment. Each project considers site conditions, pest risks, customer needs, and environmental impact. Where practical, targeted solutions help reduce unnecessary chemical use. We also explore sustainable products, smart monitoring, AI, and data-driven technologies.

Social: Safety, People and Community

Safety is fundamental to every project. Teams are supported through training, PPE, risk assessments, Toolbox Meetings, equipment, and established safety procedures. Our work in mosquito prevention, rodent management, termite protection, and public-health pest management also contributes to safer and healthier communities.

Governance: Responsibility and Accountability

We follow applicable Singapore and NEA requirements and maintain strong processes for documentation, training, risk management, and quality. Practices are aligned with ISO 45001 Occupational Health and Safety principles to support safe and responsible project delivery.

PROJECT DIRECTOR'S MESSAGE

Innovation and Continuous Improvement

We continue to explore technology, AI, real-time monitoring, digital reporting, and sustainable solutions to improve efficiency, safety, early detection, and customer outcomes. Project feedback and results help us continuously improve our processes and services.

Our Commitment

We are committed to delivering safer, smarter, and more sustainable pest management through prevention, precision, innovation, and responsible solutions that protect people, customers, communities, and the environment while creating lasting value.

Project Director's Perspective

"Safety is the foundation of every project we deliver. Through prevention, precision, innovation, and responsible pest management, we protect our people, customers, environment, and communities while upholding quality and integrity."

VINCENT TAN

PROJECT DIRECTOR
PESTIMESH

DIRECTOR'S MESSAGE

Building a Sustainable Future Through Responsible Pest Management

At Pestimesh Pte. Ltd., sustainability is at the heart of our approach to pest management. We use eco-friendly methods to effectively control pests while protecting human health and preserving the environment. It is a responsibility that guides how we serve our customers, support our people, and contribute to the communities in which we operate.

For more than a decade, we have been committed to delivering effective pest management solutions that protect public health, safeguard properties, and support the long-term sustainability of the built environment. As our business continues to grow, we remain focused on balancing operational excellence with environmental stewardship, ensuring that our services create lasting value for our stakeholders while minimising environmental impact.

Advancing Sustainable Pest Management

We believe that the most sustainable approach to pest management is one that prioritises prevention, innovation, and responsible intervention. Through the adoption of Integrated Pest Management (IPM) principles, we focus on identifying and addressing the root causes of pest issues, reducing reliance on unnecessary chemical treatments and promoting long-term pest prevention.

Our teams continuously evaluate and improve work practices to ensure that pest control solutions are delivered safely, effectively, and with consideration for environmental and community well-being. By embracing technology, data-driven decision-making, and preventive strategies, we are able to provide solutions that are both effective and environmentally responsible.

DIRECTOR'S MESSAGE

Innovation for Long-Term Impact

Innovation remains a key driver of our sustainability journey. We continue to invest in solutions that support long-term pest prevention and reduce the need for recurring treatments.

One example is our stainless steel mesh exclusion system, which provides durable physical protection against termite and pest intrusion in construction projects. By integrating preventive solutions into the built environment, we help create safer, more resilient buildings while supporting more sustainable construction practices.

Investing in Our People

Our employees are at the heart of everything we do. Creating a safe, healthy, and inclusive workplace remains a fundamental priority. We are committed to providing ongoing professional development, technical training, and workplace safety programmes that empower our employees to perform at their best while maintaining the highest standards of service and safety.

By fostering a culture of learning, accountability, and continuous improvement, we ensure that our team is equipped to meet the evolving needs of our customers and industry.

DIRECTOR'S MESSAGE

Looking Ahead

As we look to the future, we remain committed to strengthening our sustainability efforts across all aspects of our business. We will continue to explore innovative technologies, enhance operational efficiency, and promote environmentally responsible pest management practices that deliver positive outcomes for our customers, our communities, and the environment.

At Pestimesh, we believe that sustainability and business success go hand in hand. By working responsibly today, we can help build healthier, safer, and more sustainable environments for future generations.

Director's Quote

“

“We believe the future of pest management is built on smarter, more sustainable solutions. Through Integrated Pest Management (IPM), we focus on prevention, precision, and responsible pest control — protecting our communities, environments, and future.”

”

WINNIE SENG
MANAGING DIRECTOR
PESTIMESH

ABOUT THIS REPORT

This report covers **Pestimesh's** sustainability performance from:

**1 January 2025 –
31 December 2025**

Reporting framework

The report was meticulously crafted with reference to the **Global Reporting Initiative (GRI) standard**, ensuring comprehensive coverage and alignment with internationally recognised sustainability reporting practices.

Our carbon accounting processes are aligned with the **GHG Protocol methodology**, ensuring a comprehensive, transparent, and standardised disclosure of our environmental impact. Carbon emissions were calculated on ESGpedia, an ESG software used for Environmental, Social, and Governance reporting.

This report is aligned with the **United Nations Sustainable Development Goals (SDGs)**, demonstrating our commitment to integrated action across social, environmental, and economic dimensions to support the 2030 Agenda.

External assurance

No external assurance was conducted for this sustainability report.

Feedback

We welcome feedback from our stakeholders to help us further our sustainability journey. Or, if you would like to learn more about our ESG initiatives, please contact:

 **Contact:** 8236 3723

 **Address:** 80 Playfair Road, #04-05 Kapo Factory Building, Singapore 367998

 **Website:**

<https://www.linkedin.com/company/pestimesh-pte-ltd>

Pestimesh

PESTIMESH PTE. LTD, a NEA-registered pest control company, is known for its exceptional knowledge and proficiency in pest control. Our extensive experience enables us to offer comprehensive pest control services to residential, commercial, construction, F&B, industrial sectors, and beyond in Singapore. Our utmost priority is to safeguard your business and family by delivering a range of innovative solutions that are both safe and effective, while also being highly responsive to your needs.

Vision

To be the leader in pest control industry providing the best services and quality solutions.

Mission

Pest Control's mission is to provide excellent, efficient and innovative pest control services by:

- a) protecting the health and properties of customers, friends and neighbours,
- b) providing an unparalleled customer service experience,
- c) modelling courtesy and respect in every community we serve, and
- d) valuing our employees the same way we value our customers.

ESG Company Introduction

Protecting People • Protecting Properties • Protecting Communities

Our Heritage & Expertise

Established in 2011, Pestimesh Pte Ltd has developed strong experience in Singapore's pest management and termite protection industry. Our portfolio includes pest control and termite-related projects for major facilities such as ICA, Singapore Zoo, Banyan Tree Hotel, Family Justice Courts, PUB Tuas Water Reclamation Plant, Changi Airport Terminal 2, Indigo Hotel and Singapore Aviation Academy. We support developers and project management teams with pest management programmes throughout the construction phase of condominium and commercial property developments.

Specialised Termite Protection

Pestimesh has developed specialised expertise in physical anti-termite protection using stainless-steel termite mesh systems. Our Project Director, Vincent Tan, strengthened his technical knowledge through specialised experience and learning from Australia, bringing practical expertise and international knowledge into termite protection projects in Singapore. We focus on prevention and long-term building protection rather than relying only on reactive treatment.

Environment & Sustainable Pest Management

Sustainability is increasingly embedded in our operations. Through Integrated Pest Management (IM), we emphasise prevention, monitoring, targeted treatment and responsible use of pest management methods. Where practical, we seek solutions that reduce unnecessary chemical use, minimise environmental impact and provide effective, long-term protection for buildings and communities.

ESG Company Introduction

Protecting People • Protecting Properties • Protecting Communities

Social Responsibility & Community

Pestimesh has developed specialised expertise in physical anti-termite protection using stainless-steel termite mesh systems. Our Project Director, Vincent Tan, strengthened his technical knowledge through specialised experience and learning from Australia, bringing practical expertise and international knowledge into termite protection projects in Singapore. We focus on prevention and long-term building protection rather than relying only on reactive treatment.

People, Upskilling & Digital Innovation

Our people are central to our ESG journey. We continue to invest in training and upskilling so that our team can strengthen technical knowledge, safety awareness and professional capabilities. At the same time, Pestimesh is embracing AI and digital applications to streamline reporting and reduce repetitive administrative work. By working smarter, our employees can spend more time on site quality, safety, customer service and effective pest management.

Our ESG Commitment

Pestimesh is committed to building a responsible and resilient pest management business through sustainable practices, community engagement, people development and technology adoption. We will continue to improve our environmental performance, strengthen governance and safety practices, invest in our people, and use innovation.

COMMITMENT TO UNSDGs

At Pestimesh, sustainability shapes how we design and deliver our pest management services. From the treatment methods we choose to the materials used in our termite mesh installations, our work supports broader progress towards the United Nations Sustainable Development Goals. The overview below sets out how Pestimesh's operations and ongoing commitments contribute to key environmental and social priorities for a safer and more sustainable Singapore.

Our Sustainable Development Goals

SDG	Our Contributions
 3 GOOD HEALTH AND WELL-BEING	Protecting homes and businesses from pest related health risks through safe and effective treatment methods.
 6 CLEAN WATER AND SANITATION	Careful management of water based treatments to prevent contamination of surrounding water sources.
 8 DECENT WORK AND ECONOMIC GROWTH	Providing stable employment and hands on technical training for our workforce of technicians and support staff.
 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE	Applying Australian sourced mesh technology and innovative treatment techniques to improve service durability and effectiveness.
 11 SUSTAINABLE CITIES AND COMMUNITIES	Supporting safe and liveable homes and workplaces through preventive pest management for the community.
 12 RESPONSIBLE CONSUMPTION AND PRODUCTION	Selecting treatment products and methods that reduce unnecessary chemical use and environmental exposure.
 15 LIFE ON LAND	Choosing pest control approaches that limit harm to wildlife and the surrounding ecosystem.

Memberships

Pestimesh is an active member of these associations:

The Singapore Business Federation

The Singapore Business Federation (SBF) is the apex business chamber representing the interests of Singapore's business community across trade, investment and industrial relations, bringing together more than 32,000 companies and key local and foreign business chambers.

The Society of Modern Management

Established in 1984, the Society of Modern Management promotes the adoption of modern management practices among local enterprises, serving as a bridge between businesses and government agencies to help members strengthen competitiveness and drive innovation.

Ang Mo Kio Constituency Merchant Association

The Ang Mo Kio Constituency Merchant Association brings together local merchants and businesses within the Ang Mo Kio community, fostering networking, mutual support and closer ties between members and the residents they serve.

Singapore Pest Management Association

The Singapore Pest Management Association represents pest control companies operating in Singapore, promoting professional standards, industry knowledge sharing and best practices to raise the overall standard of pest management services in the country.

MATERIAL TOPICS

Material Topic Overview

Determining the sustainability topics most relevant to our operations is an important step in ensuring this report speaks to what matters most to Pestimesh and our stakeholders. For this first sustainability report, Pestimesh identified its material topics by benchmarking against practices commonly adopted within the pest management and facilities services sector. Going forward, we intend to deepen this process by engaging both employees and external stakeholders, allowing future assessments to draw on a wider range of perspectives.

Methodology and Standards

Our approach to identifying material topics drew on guidance from the Global Reporting Initiative (GRI) and the Sustainability Accounting Standards Board (SASB), tailored to the nature of pest management services. We also reviewed sustainability disclosures published by other companies operating in facilities management and related service industries to ensure our reporting reflects recognised practices within comparable sectors.

ENVIRONMENTAL METRICS

Total Energy
Consumption

758.83
GJ

Breakdown of Energy Consumption

Pestimesh recorded energy use from petrol, diesel and electricity across its operations in FY2025. Petrol and diesel consumption came from the fleet of vehicles used to transport technicians and materials to residential, commercial and construction sites for pest control and termite mesh installation works, while electricity consumption was drawn from the company's office operations.

ENVIRONMENTAL METRICS

Water Consumption

262.50 m³

Total Water Consumption

(m³)

In FY2025, Pestimesh took active steps to reduce water use tied to its anti-termite treatment operations, through the following initiatives:

Optimised anti-termite treatment: rather than applying a fixed volume of chemical and water per job, we calculate the required amount based on the specific site area for each treatment, ensuring more accurate usage and minimising leftover chemicals and water waste.

Non-chemical termite prevention using stainless steel mesh: we install stainless steel mesh as a physical barrier in areas that come into contact with construction soil, reducing our reliance on chemical treatment and, in turn, lowering the associated water and chemical consumption.

As this is our first year tracking water consumption, we intend to build on this baseline by continuing to identify further opportunities to conserve water across our operations.

ENVIRONMENTAL METRICS

GHG Emissions

Total GHG Emissions Breakdown in FY2025

(tCO₂e)

Note: Graphs are not to scale for visualisation purposes

Scope 1 Emissions

46.45

tCO₂e

Scope 2 Emissions

8.32

tCO₂e

Scope 3 Emissions

0.15

tCO₂e

As FY2025 marks Pestimesh's first year of emissions reporting, the figures gathered this period will serve as the baseline against which future performance is measured. Scope 1 emissions arise mainly from petrol and diesel used across our vehicle fleet, while Scope 2 emissions stem from electricity consumption at our office. This baseline gives us a clear starting point to monitor year on year performance and evaluate the impact of our sustainability efforts over time. With this reference in place, Pestimesh will be better positioned to set meaningful reduction targets and track progress towards our long term sustainability goals.

By Gender Group	Male	19	70%
	Female	3	50%

Note: Rates are calculated by dividing the number of new hires by the current employee headcount for each respective category.

New Hires by Nationality

At Pestimesh, welcoming new employees allows us to bring in fresh talent, new perspectives and renewed energy to support our growing operations. Each new hire plays a part in strengthening our technical capabilities and service delivery as the company expands. Looking ahead, we remain committed to attracting and nurturing capable individuals, building a steady pipeline of skilled technicians and staff who will support Pestimesh's long term growth and success.

Note: Rates are calculated by dividing the number of turnover by the current employee headcount for each respective category.

At Pestimesh, we understand that nurturing a workplace where employees can grow and feel settled is essential to the strength of our team. We are committed to building an environment where individuals feel secure, valued and encouraged to remain part of the Pestimesh family for the long term.

To support our employees' wellbeing and stability, we provide a comprehensive range of benefits which reflect our ongoing commitment to helping our people thrive both personally and professionally.

SOCIAL METRICS

Supporting Employee Well-being

Employment Benefits & Employee Well-being

Our employees are at the heart of our business and play a critical role in delivering safe, reliable and responsible pest management services. As a responsible employer, we are committed to creating a workplace that supports employee well-being, provides fair employment opportunities and encourages continuous learning and career development.

We recognise that pest management is a hands-on industry where employees may work in a wide range of environments and encounter occupational risks, including chemical handling, outdoor conditions, working at height, driving and the use of specialised equipment. We therefore place strong emphasis on employee health, safety, training and access to appropriate employment benefits.

Supporting Our Employees

We strive to provide employees with a fair and supportive employment experience. Depending on role and eligibility, our employment benefits and support may include:

- Fair remuneration and statutory benefits in accordance with applicable employment requirements.
- Medical and healthcare benefits to support employees' physical well-being.
- Insurance and workplace protection to provide employees with greater security.
- Paid leave and applicable family-related benefits, supporting employees in balancing work and personal responsibilities.
- Personal protective equipment (PPE) and appropriate work equipment for employees undertaking field operations.
- Training and professional development to strengthen technical, safety and professional capabilities.
- Health, safety and wellness initiatives that promote a safe and healthy working environment.
- Employee communication and engagement, providing opportunities for employees to raise concerns, provide feedback and contribute to workplace improvements.
- Employee gatherings and celebrations, including birthday celebrations and other informal activities, to recognise employees, strengthen team relationships and foster a positive workplace culture.

SOCIAL METRICS

Supporting Employee Well-being

Beyond formal employment benefits, we believe that creating opportunities for employees to connect and celebrate together contributes to a supportive and inclusive working environment. From time to time, the company organises employee gatherings and birthday celebrations, providing opportunities for colleagues to interact, recognise personal milestones and build stronger relationships within the team.

We believe that providing appropriate benefits and fostering a positive workplace culture contributes not only to employee well-being, but also to employee engagement, retention, teamwork and the long-term resilience of our business.

Health & Safety

Employee health and safety is an important part of our Social ESG commitments. We seek to identify and manage workplace risks through appropriate risk assessments, safe operating procedures, training and the provision of suitable protective equipment.

For our field employees, safety practices may include appropriate PPE, safe chemical handling procedures, equipment safety, vehicle safety, working-at-height precautions and emergency response procedures. Regular safety briefings and training help reinforce safe working practices and encourage employees to take an active role in maintaining a safe workplace.

We also encourage the reporting of incidents, near misses and unsafe conditions. Employee feedback enables us to identify areas for improvement and continuously strengthen our safety practices.

SOCIAL METRICS

Supporting Employee Well-being

Learning & Career Development

We recognise that continuous learning is essential in the pest management industry. Employees are provided with relevant training based on their roles and responsibilities, including technical pest management knowledge, safe handling and application of treatment products, equipment operation, occupational health and safety and customer service.

Beyond technical competencies, we aim to support employees in developing their careers within the organisation. Providing opportunities for skills development, increased responsibility and career progression helps employees build long-term careers while strengthening the capabilities required to deliver high-quality services.

Fair Employment & Employee Engagement

We are committed to maintaining a workplace where employees are treated fairly, respectfully and with dignity. Employment decisions relating to recruitment, remuneration, training, promotion and career development are based on relevant qualifications, capabilities, performance and business requirements.

We do not tolerate discrimination, harassment, bullying, forced labour or child labour. We aim to foster an inclusive workplace where employees can communicate openly and raise concerns without fear of retaliation.

We will continue to review and enhance our employment practices, benefits, training programmes and employee engagement initiatives as part of our commitment to being a responsible employer.

SOCIAL METRICS

Community Health & Well-being

Pestimesh recognises that contributing to the well-being of the wider community is an important part of responsible business. Through its community initiatives, the Company seeks to support healthier, safer and more inclusive environments while using its expertise and resources to create positive social impact.

Supporting Public Hygiene

Pestimesh carried out disinfection and environmental hygiene activities at Bedok Market 216, contributing to efforts to maintain a cleaner, safer and more hygienic public environment for market operators, workers and members of the public. The initiative demonstrates the Company's commitment to supporting public hygiene and community well-being, while applying its expertise in environmental hygiene and disinfection services to shared community spaces.

勿洛北巴利与熟食中心 大规模消毒后重开 今早生意恢复约六七成

李宜道 报道 lee@ph.com.sg

勿洛北巴利与熟食中心进行三天的大规模消毒和清洁工作后，今早生意恢复约六七成。受访食客认为经清洗后更安心，而摊贩亦表示有信心重新开张。

本报早前报道，勿洛北巴利与熟食中心因发现新冠病毒阳性个案，导致第216座巴利与熟食中心生意大跌，当局决定把季度的例行清洁提前到上星期日进行，为期三天，以进行公共区域的大规模彻底清洁与消毒。

今天该巴利与熟食中心恢复营业。记者今早走访时，勿洛北巴利216座巴利与熟食中心高联会主席林宝(62岁)说，目前约有七成的摊位开张，但人潮已和上周仿若，希望随着所有摊位开张后，生意会逐渐恢复正常。

熟食档主林宝(69岁)受访时说，有些摊贩趁

Community Health & Well-being

Promoting Dengue Awareness

Pestimesh conducted a dengue awareness talk to share knowledge on dengue prevention and the importance of proactive mosquito control. The session provided participants with practical information on identifying potential mosquito breeding habitats, adopting preventive measures and maintaining a clean environment. Through such awareness initiatives, Pestimesh supports greater understanding of dengue prevention and encourages individuals and communities to take an active role in reducing mosquito-related health risks.

Supporting Active Communities

Pestimesh is also a sponsor of the Tchoukball Association of Singapore (TBAS), supporting the development and promotion of tchoukball and greater participation in community sport. Through this sponsorship, the Company contributes to opportunities for physical activity and encourages healthy, active lifestyles, while supporting values such as teamwork, discipline and community engagement. This initiative reflects Pestimesh's broader commitment to contributing to the social well-being of the communities it serves.

Safety remains a top priority at Pestimesh, particularly given the nature of our work handling treatment chemicals and operating across varied residential, commercial and construction sites. We are committed to protecting our workforce through strict safety practices, clear operating guidelines and continuous training on the proper handling of equipment and materials.

Whenever incidents do occur, we conduct thorough investigations to identify root causes and strengthen our procedures accordingly. These improvements help us enhance risk management, refine our safety systems and build a stronger safety culture. Our goal is to ensure every technician feels protected and confident while carrying out their work.

At Pestimesh, continuous learning underpins both the growth of our employees and the reliability of the service we provide. Ongoing training helps our technicians stay current with evolving treatment techniques, regulatory requirements and safe handling practices within the pest management industry. Employees will also undergo heat stress and safety awareness activities and have regular toolbox meetings as part of our training and development initiatives.

Our employees have access to a range of training opportunities, including certification and licensing courses required for pest control operators, hands on training drawing from techniques developed in Australia, and mentorship from more experienced technicians. These training opportunities help our team sharpen their technical skills, grow professionally and continue to deliver dependable service that supports Pestimesh's ongoing success.

Anti-Corruption

Pestimesh currently has no reported incidents of corruption within its operations.

Bribery is unlawful in Singapore and runs contrary to the values Pestimesh upholds as a company. Any act of corruption carries the risk of criminal prosecution for those involved and can bring lasting harm to the company's standing. We regard any offer of value, whether given directly or through an intermediary, intended to secure or retain business as an act of bribery.

Pestimesh pursues business opportunities on fair and ethical terms. We do not offer, approve or accept anything of value to gain an unlawful advantage, and we do not extend gifts, travel or entertainment as a means of securing business. Cash or cash equivalent gifts are never acceptable under any circumstance, and any business obtained through means inconsistent with our values has no place at Pestimesh.

Employees are expected to raise any conduct that appears suspicious so as to protect the company's integrity and reputation. We likewise expect our business partners to uphold similar principles and will not engage third parties known to have a history of corrupt practices.
